U.S. EXPORT SALES

- Outstanding Export Sales
(Unshipped Balances)
on November 17, 1974
- Export shipments in
Current Marketing Year
- Daily Sales reported
November 18-26

--As Reported by Exporters

Readers of this release are cautioned that it reports sales commitments outstanding as of the date indicated, all of which are subject to modification, deferral or cancellation by mutual agreement of the parties. It is unlikely that all reported quantities will be exported. Our brief experience with this monitoring system suggests that sales are apt to exceed exports, sometimes by substantial amounts, during periods when supplies are in balance with expected demand. Actual shipments to date may provide a more reliable measure of current export activity. A meaningful export projection is not obtainable by the simple device of adding outstanding sales commitments to exports to date.

U.S. DEPARTMENT OF AGRICULTURE, FOREIGN AGRICULTURAL SERVICE

EXPORT SALES REPORT

Comments on November 29, 1974, release:

Wheat: Apparent export commitments for U.S. wheat (exports to date plus outstanding sales) continue to run below the USDA forecast for 1974/75. However, a number of importing countries have yet to cover their entire requirements for the marketing year. Brazil's wheat import requirements during 1974/75 are estimated at about 2.0 million metric tons (M.T.) while to date its only purchases for delivery in 1974/75 have been 325,000 M.T. from the United States, 80,000 M.T. from Argentina, and about 640,000 M.T. from Canada. Brazil is expected to tender for an unspecified amount of wheat during the coming week. No bids have been accepted by Brazil against tenders since early October.

Feed Grains: Good moisture conditions in the corn producing regions of Brazil, Argentina, and South Africa have favored planting and bode well for crops to be harvested next April/May. Corn acreage in Brazil and Argentina is estimated to be above last year's level, and about the same in South Africa. Next spring's corn crop in the 3 countries is now forecast at 36 million M.T., about equal to the record harvest realized this year. The availability of this amount of corn should help to alleviate the relatively tight world feed grain supply situation late in the 1974/75 marketing year.

Rice: The total export commitment dropped during a relatively inactive week as exports again exceeded new sales. Declines were recorded in outstanding sales to both known and unknown destinations.

Soybeans: Reported export commitments to Japan total approximately 4 million M.T., well above the current USDA estimate of 3 million M.T. to that country in 1974/75 and exports of only 2.8 million M.T. in 1973/74. However, Japanese imports of soybeans to date in 1974/75 are running at a level nearly 20 percent below that of the same period last year, reflecting uncertainty over economic conditions and the stagnant feed/livestock situation in that country. An increase in Japanese soybean imports is anticipated during the remainder of 1974/75.

Soybean Cake and Meal: At just over 40,000 M.T., exports during the week dropped more than 100,000 M.T. from the level of the previous week and, on an unadjusted annual rate basis, continue to run below the USDA estimate for the full marketing year. Trade sources indicate that supplies on hand in the European Community and Japan exceed current requirements, a factor which may be temporarily dampening U.S. exports. Japan has been purchasing soybean oil to balance its protein/edible oil position.

Cotton: During a relatively quiet week, exports of 58,000 running bales (R.B.) were greater than the reduction of 7,000 R.B. in outstanding sales, thus producing a marginal increase in the apparent total commitment for 1974/75.

OUTSTANDING EXPORT SALES AND EXPORTS - MARKETING YEAR 1974-75
